### Basic Responsibilities:

Provides home and community-based intervention and support to families with infants, young children, and youth with mental health issues. Outreach services help to promote positive parenting attitudes and skills, improve family relationships, encourages use of positive approaches to child behavior/discipline, and interventions the caregivers may utilize to support healthy social and emotional development of the child, and to remediate problem behaviors. Provides Home-Based services including assessments, clinical intervention, identifying/intervening in mental health needs, alleviating crisis, and ensuring stabilization in the community for assigned youth and their families.

### Summary of Required Qualifications:

- Master's degree in a mental health related field with appropriate state licensure.
- At least 1 year of experience working with families with young children.
- Demonstrated knowledge/training of social work practice as it relates to working with families of young children, including the ability to understand age-appropriate functioning, developmental stages, and the impact of the parent/child relationship, in order to provide assessment, diagnosis, appropriate intervention, and referral.
- Able to achieve a Level II endorsement by the Michigan Association of Infant Mental Health within 18 months of hire.
- Valid Michigan driver's license with an approved driving record in accordance with agency standards.

### Summary of Essential Job Functions:

- Assesses the needs/wishes of customers and their families through a Person/Family Centered process including the developmental and emotional needs of young children and facilitates appropriate referrals.
- Develops, implements, documents, and reviews case management/clinical methodology of service delivery, interventions, and objectives in a Person/Family Centered Service Plan.
- Intervenes with individuals, couples, families, or groups in coordination with the Person/Family Centered Service Plan to enhance or restore the capacity for social and interpersonal functioning in the home/school/community.
- Provides outreach crisis/clinical intervention, case management, medication monitoring, and other services.
- Monitors and documents all progress related to goals and objectives as listed in the master service plan including the family/customer's stability and the effectiveness of current services.
- Assists families in the development of positive parent-child reciprocal interactions and attachments; facilitates the enhancement of problem-solving skills, the reduction of psychological and environmental stressors, and the development of social support systems.
- Consults, links & advocates with other community services, providers, and agencies to ensure assigned child/parent(s) receive appropriate health and human services as needed.
